

DAYTECH SYSTEMS

CALIBRATION & PROCESS OPTIMISATION

OUR EXPERTS DELIVER RESULTS - PROVIDING MORE THAN JUST CALIBRATION & COMPLIANCE

Equipment inspection, instrument calibration and process optimisation, particularly in complex plants, can yield very large paybacks for industrial operators.

For the best results, you need competent, collaborative and experienced experts, who have the best equipment and a high attention to detail with your particular plant and process..

DAYTECH are your trusted partner.

DAYTECH SYSTEMS

QUALIFIED CALIBRATION, PROCESS & INSTRUMENTATION OPTIMISATION CAPABILITIES:

- Process and Environmental Instrumentation System Calibrations
- Load Cell, Weightometer (Belt Weigher) Calibrations
- Temperature, Pressure, Level, Distance and Process Calibrations
- Flowmeter verification, flow meter surveys using clamp-on meters, Mass Flow Meter Calibration, Density Calibration
- Control Valve Calibration, Positioner Calibration, I/P Calibrations
- Analytical Instrument Calibration, such as pH Transmitters, EC Transmitters and Water Quality Transmitters
- GPS positioning systems, LiDAR with 2D and 3D scanning systems for various applications including mobile robotics
- Safety Scanners, laser scanners, barcode scanners, laser distance.
- Process measurement and control systems specialists, including product selection, installation, and commissioning
- Chemical and Process Optimisation Services
- Instrumentation and Control Optimisation and Improvements
- Traceable calibration certificates & reports issued for each item
